★ TOP INSIGHTS

- 📈 Discounts above 20% tend to reduce profit across most product categories.
- 🛍️ clothing is the highest revenue-generating category, contributing 36.7% of total revenue.
- 👥 Customers aged 20–39 have the highest average spending.
- 💳 Digital payment methods are the most preferred by customers.
- 📍 West Region delivers the highest overall revenue.

Recommendations

- Optimize Discount Strategy
 - Maintain discounts within the **optimal range (around 5–15%)**, where revenue growth and profitability are better balanced.
 - Avoid excessive discounts (above 20%) unless the objective is inventory clearance or customer acquisition, as they can significantly reduce profit margins.
- Implement Category-Based Pricing
 - Use different pricing strategies for different product categories rather than applying uniform discounts.
 - Provide larger discounts only for price-sensitive categories while protecting margins in high-performing categories.
